The rules for sudoku are simple. A 9x9 square must be filled in with numbers from 1-9 with no repeated numbers in each line, horizontally or vertically. To challenge you more, there are 3x3 squares marked out in the grid, and each of these squares can't have any repeat numbers either.

The puzzles will help you get started by providing some correct numbers – the fewer numbers provided, the more difficult the puzzle.

Here are a few tips that can help beginners solve sudoku puzzles:

1. Look for the Easy Solutions
2. Seek the Missing Numbers
3. Keep Scanning the Entire Puzzle
4. Constantly Re-Evaluate the Grid
5. Be Patient and Enjoy the Hunt
